MOBILE INTERNET

# Unlock Limitless Learning: Empower Your Campus with Ultimate Connectivity

With the surge in remote students and staff, reliable, high-speed internet has never been more vital. The California Connects program is tailored for California Community Colleges to uphold your dedication to accessible, ongoing education.

Franklin T10 Mobile Hotspot Device Coupled with Monthly Service

The California Connects program offers the Franklin T10 mobile hotspot device with 4G or 5G connectivity, enabling your college to provide students, faculty, and staff with a reliable, cost-effective internet connection solution.

$19.99*
PER MONTH

- No Throttling, Suspension, or Overage Charges: provide access to educational resources, virtual classrooms, and communication platforms.
- Reliable Coverage: Benefit from extensive 4G and 5G coverage, subject to network prioritization, ensuring your academic community stays connected wherever they are. Coverage and network availability vary by area; detailed information is available at tmobile.com/coverage.
- Available at a monthly rate of $19.99*, excluding a one-time device cost.

Invest in Your Students' Success

By partnering with ComputerLand to offer the Franklin T10 mobile hotspot device, your institution can:

- Enhance remote learning capabilities, ensuring students have the necessary tools to succeed in their academic pursuits.
- Support faculty and staff in delivering high-quality education and services, regardless of location.
- Demonstrate your college's commitment to technological advancement and educational equity.
- Coverage and network availability vary by area; detailed information is available at tmobile.com/coverage.

*Monthly rate does not include one-time device cost. Includes 4G or 5G connectivity with no throttling, suspension, or overage charges.
