

ComputerLand of Silicon Valley is a women and minority owned Technical Solutions Provider, with over 30 years of experience working with enterprise, education, and public sector clients. We provide a wide spectrum of technology infrastructure and related services, including data center design, backup & recovery, and business continuity solutions. We are focused on keeping cost control and risk mitigation in the forefront, while helping our clients achieve their business goals.

For the last 15 years, ComputerLand has been consistently recognized by The Channel Company as part of CRN's Solution Provider 500 list, which ranks the top IT Solution Providers in North America.
